SUMMARY

Technology-focused professional with experience in software engineering, UX design, data analysis, and digital innovation. Skilled in building internal tools and data-driven applications, with a focus on improving business processes and delivering user-centered solutions. Passionate about creating intuitive, accessible, and impactful digital experiences.

WORK EXPERIENCE

Business Systems Analyst – Sisvel, Luxembourg Sept 2025 – Present

- Designed and developed an internal HR platform for peer review and performance management, owning end-to-end UI/UX and backend/frontend architecture using TypeScript and React; successfully launched in December 2025.
- Built a custom distribution calculator with a focus on usability and abstraction, enabling complex data modeling through a clean and interactive UI using Typescript, React and Node.js.
- Supported the implementation and integration of enterprise tools (e.g. ERP, financial and contract management systems), analyzing technical constraints and ensuring a correct integration across platforms.
- Engineered a web scraping solution to gather and structure external market data to support business decisions.
- Creating automated workflows using Power Automate to enhance operational efficiency, including real-time notifications and process automation.
- Contributing to Salesforce-related implementations, ensuring alignment with business processes and user needs.
- Developing a data governance solution for data and permission management across internal tools.

Business Advisor – EIF, Luxembourg Jan 2025 – July 2025

- Created an intuitive Power BI dashboard that made budget tracking easier for different stakeholders, helping them act on €35M in advisory funds.
- Translated complex financial and project data into clear tools and workflows that stakeholders across the EU could easily understand.
- Built a Tableau-based catalogue linking Private Credit (PCs) with Guarantees (GTs), automating data consolidation and cross-referencing to identify co-investment opportunities;

Project Manager Officer (PMO) – SES, Luxembourg Feb 2024 – Aug 2024

- Designed and delivered a user-centered Power BI dashboard from scratch: conducted interviews, coded insights, applied Nielsen's 10 heuristics, prototyped in Balsamiq, and iterated through usability testing with project managers.
- Conducted predictive analysis and modeling using Monte Carlo simulation at both organizational and project levels, providing accurate future forecasts and improving project planning accuracy.
- Assisted in defining project goals, scope, and deliverables, helping develop project plans, timelines, and resource allocation with Jira.
- Led a cost-reduction initiative by auditing software usage and transitioning 70% of users to optimized license plans.
- Improved the usability of internal platforms by identifying pain points and suggesting design enhancements that made everyday workflows smoother and more intuitive.

Software Developer – Zenitech, Romania

Jul 2021 – Aug 2022

- Developed the front-end components of a mobile application for digital inventory management, streamlining the company’s inventory processes using React Native.
- Collaborated on the design and back-end development of a mapping app for architects, integrating Google Maps API to help users easily draw and manage project areas.

EDUCATION

2022 - 2024

MSc in Human-Computer Interaction and Design at Aalto University and Technical University of Madrid

2018 - 2022

BSc in Computer Engineering at Technical University of Cluj-Napoca

SKILLS

Software Development	React, TypeScript, JavaScript (ES6+), HTML5, CSS3, REST APIs, Node.js, Java, Python, MySQL, PostgreSQL
Frontend & UI Engineering	Component-based architecture, Responsive UI development, Scalable frontend applications, UI performance optimization, API integration, Design system implementation, Cross-browser compatibility, Accessibility (WCAG)
UX & Product Design	UX implementation, Wireframing, Prototyping, User flows, Usability testing, Iterative design, A/B testing
Tools & Platforms	React ecosystem tooling, Power Automate, Salesforce, Figma, Power BI, Tableau, Excel, Balsamiq, Lovable, Windsurf
Collaboration & Process	Agile/Scrum, Cross-functional collaboration, Stakeholder management, Technical communication, Product-driven development, Design-system thinking
Languages	Romanian (native), English, French (fluent), Spanish (intermediate)
